

Percutaneous Cardiovascular Procedures in Kentucky Hospitals, 2006-2012

MSDRG	2006	2007	2008	2009	2010	2011	2012
246 246 PCTA w Drug-eluting Stent w MCC or 4+	1401	1120	1251	1560	1448	1300	1182
247 247 PCTA w Drug-eluting Stent wo MCC	12146	8038	7017	8756	8173	7018	5906
249 249 PCTA w Non-drug Stent wo MCC	1375	2938	2604	2183	1962	1755	1272
251 251 PCTA wo Stent or AMI, wo MCC	1518	1433	1410	1318	1220	1281	1140
Totals:	16,440	13,529	12,282	13,817	12,803	11,354	9,500

Comment:
The data represent the number of discharges from all Kentucky hospitals for the four most commonly performed PTCAs.

PTCA= Percutaneous Transluminal Coronary Angioplasty.
MSDRG = Medical Severity Diagnosis Related Groups.
MCC= Major Complication or Co-morbidity.
4+ indicates number of arteries or stents.
AMI= Acute Myocardial Infarction (Heart Attack)
w= with
wo= without

Data from Kentucky Hospital Association.
